VIDEO EXPLANATION

Russia's Northern Sea Fleet Command also released a video statement regarding the simultaneous launch of four intercontinental ballistic missiles.

The statement, emphasizing that four ballistic missiles were tested simultaneously for the first time in history, said, **"Our strategic submarine, the Yuriy Dolgoruki, successfully launched four intercontinental 'Bulava' missiles simultaneously from the White Sea waters in the Arctic region for the first time in history. The missiles, launched from a depth of approximately 40 meters underwater, a few seconds apart, struck targets at the 'Kura' range on the Kamchak Peninsula** . "

A total of 16 intercontinental ballistic missiles are on board the strategic submarines of this class in the Russian Navy.
